The CIBSE COVID-19 ventilation guidance is under continued review. CIBSE are currently evaluating evidence to provide guidance for the cooler autumn and winter seasons. During the cooler months heating the volumes of outdoor air needed to supply the high ventilation rates used in summer will be energy intensive. In some systems it may not be

Guide C: Reference data (2007) (pdf)

CIBSE Guide C: Reference Data. Cibse, Routledge, Jun 7, 2007 - Technology & Engineering - 328 pages. 0 Reviews. Guide C: Reference Data contains the basic physical data and calculations which form the crucial part of building services engineer background reference material. Expanded and updated throughout, the book contains sections on the properties of humid air, water and steam, on heat transfer, the flow of fluids in pipes and ducts, and fuels and combustion, ending with a comprehensive ...

CIBSE Guide C: Reference Data - Cibse, - Google Books
The latest version of the CIBSE Covid-19 ventilation guidance explores this further. It emphasises that – at the least – the ventilation strategy should achieve the equivalent minimum provision of outside air ventilation rate for the space over the occupied period, as defined in current standards, and ventilation rates beyond this should ensure thermal comfort is not significantly compromised.
