Connecting to an SAP Data Source - Informatica

Before the PowerCenter Designer connects to a TIB/Repository instance to import TIBCO definitions, you install an adapter instance in TIB/Designer. TIB/Designer is a graphical user interface that lets you define an adapter instance. You use the adapter instance to start a TIB/Repository session to access a TIB/Repository instance.

PowerCenter Designer Integration with TIB/Repository

Design API Example Overview This chapter discusses a sample application that shows how to use the Design API to create and run a workflow without using the PowerCenter Client tools. The sample application named SlowChangingDimension is a stand-alone application written in Java.
