Melanin (/ □mɛlənɪn / (listen); from Greek: μέλας  
melas, "black, dark") is a broad term for a group of  
natural pigments found in most organisms. Melanin is  
produced through a multistage chemical process  
known as melanogenesis, where the oxidation of the

Melanin theory is a claim in Afrocentrism that a higher level of melanin, the primary determinant of skin color in humans, is the cause of an intellectual and physical superiority of dark-skinned people and provides them with superior abilities or even mystical / supernatural ones. It is a racist, pseudoscientific theory.

~~Melanin theory - Wikipedia~~

A dark brown coloring found in the body, especially in the skin and hair. Produced by special skin cells that

~~Ultraviolet light exposure enhances the protective ability ...~~

Also called pigment, melanin is a substance that gives the skin and hair its natural color. It also gives color to the iris of the eye, feathers, and scales. In humans, those with darker skin have higher amounts of melanin. By contrast, those with less pigment have lighter or more fair skin coloring.
