There are several threats that include risks to service and network that have yet to be calculated. According to the Cloud Security Alliance (CSA), they have discovered several threats to cloud computing, that includes abuse and nefarious use of cloud computing. The top threat is the ability for bots to spread malware and spam.

Cloud Computing Security threats and Countermeasures

System Threats. Patches and updates. Failure to update systems, particularly when a patch is issued, is a serious database security risk. Whenever public notice is given about a new patch, hackers are made aware of a weakness and look for systems that have not yet been updated. Therefore, staying on top of software updates is vital. Injections

Database Security Threats and Countermeasures

Editor's note: This is a rapidly evolving story and the information published below is current as of 31 January. International student movement, along with class and exam schedules in China, have already been impacted by an outbreak of the novel coronavirus (aka 2019-nCoV). The virus originated in Wuhan and, as of 31 January, has killed more than 200 people, sickened nearly 10,000, and left ...
