Several Simple Real-world Applications of Linear Algebra Tools. In this paper we provide several real-world motivated examples illustrating the power of the linear algebra tools as the product of matrices and matrix notation of systems of linear equations. To explain some mathematical terms in a class or in a textbook it is often convenient to illustrate them by suitable examples having applications in our daily life.

There are several real-world applications of these phenomena. One example is the use of air bags in automobiles. Air bags are used in automobiles because they are able to minimize the effect of the force on an object involved in a collision. Air bags accomplish this by extending the time required to stop the momentum of the driver and passenger.
