There are two types of engines for Toyota Axio: 1.5 liter and 1.8 liter, both in-line 4-cylinder engines. The 1.8 liter engine was developed especially for Toyota Corolla series. It generates power and torque of 100kw (136ps)/175Nm while still being eco-friendly and fuel-effective. For transmission, some low priced grades have a 5-speed MT, but basically Toyota Axio is equipped with ...

Covers all U.S. and Canadian models of Toyota Camry, Avalon, Solara and Lexus ES 300/330 models.

Auto Repair For Dummies, 2nd Edition (9781119543619) was previously published as Auto Repair For Dummies, 2nd Edition (9780764599026). While this version features a new Dummies cover and design, the content is the same as the prior release and should not be considered a new or updated product. The top-selling auto repair guide--400,000 copies sold--now extensively reorganized and updated Forty-eight percent of U.S. households perform at least some automobile maintenance on their own, with women now accounting for one third of this \$34 billion automotive do-it-yourself market. For new or would-be do-it-yourself mechanics, this illustrated how-to guide has long been a must and now it's even better. A complete reorganization now puts relevant repair and maintenance information directly after each automotive system overview, making it much easier to find hands-on fix-it instructions. Author Deanna Sclar has updated systems and repair information throughout, eliminating discussions of carburetors and adding coverage of hybrid and alternative fuel vehicles. She's also revised schedules for tune-ups and oil changes, included driving tips that can save on maintenance and repair costs, and added new advice on troubleshooting problems and determining when to call in a professional mechanic. For anyone who wants to save money on car repairs and maintenance, this book is the place to start. Deanna Sclar (Long Beach, CA), an acclaimed auto repair expert and consumer advocate, has contributed to the Los Angeles Times and has been interviewed on the Today show, NBC Nightly News, and other television programs.

Welcome to the all-new second edition of Navigating the Digital Age. This edition brings together more than 50 leaders and visionaries from business, science, technology, government, academia, cybersecurity, and law enforcement. Each has contributed an exclusive chapter designed to make us think in depth about the ramifications of this digital world we are creating. Our purpose is to shed light on the vast possibilities that digital technologies present for us, with an emphasis on solving the existential challenge of cybersecurity. An important focus of the book is centered on doing business in the Digital Age--particularly around the need to foster a mutual understanding between technical and non-technical executives when it comes to the existential issues surrounding cybersecurity. This book has come together in three parts. In Part 1, we focus on the future of threat and risks. Part 2 emphasizes lessons from today's world, and Part 3 is designed to help you ensure you are covered today. Each part has its own flavor and personality, reflective of its goals and purpose. Part 1 is a bit more futuristic, Part 2 a bit more experiential, and Part 3 a bit more practical. How we work together, learn from our mistakes, deliver a secure and safe digital future--those are the elements that make up the core thinking behind this book. We cannot afford to be complacent. Whether you are a leader in business, government, or education, you should be knowledgeable, diligent, and action-oriented. It is our sincerest hope that this book provides answers, ideas, and inspiration. If we fail on the cybersecurity front, we put all of our hopes and aspirations at risk. So we start this book with a simple proposition: When it comes to cybersecurity, we must succeed.

When the war ended on August 15, 1945, I was a naval engineering cadet at the Kure Navy Yard near Hiroshima, Japan. A week later, I was demobilized and returned to my home in Tokyo, fortunate not to find it ravaged by firebombing. At the beginning of September, a large contingent of the American occupation forces led by General Douglas MacArthur moved its base from Yokohama to Tokyo. Near my home I watched a procession of American military motor vehicles snaking along Highway 1. This truly awe-inspiring cavalcade included jeeps, two-and-a-half-ton trucks, and enormous trailers mounted with tanks and artillery. At the time, I was a 21-year-old student in the Machinery Section of Engineering at the Tokyo Imperial University. Watching that magnificent parade of military vehicles, I was more than impressed by the gap in industrial strength between Japan and the U. S. That realization led

me to devote my whole life to the development of the Japanese auto industry. I wrote a small article concerning this incident in Nikkei Sangyo Shimbun (one of the leading business newspapers in Japan) on May 2, 1983. The English translation of this story was carried in the July 3, 1983 edition of the Topeka Capital-Journal and the September 13, 1983 issue of the Asian Wall Street Journal. The Topeka Capital-Journal headline read, "MacArthur's Jeeps Were the Toyota Catalyst."

Summary 'The Economic Security of Business Transactions' covers such aspects as: management in the economic system; commercial risk in domestic and international transactions; an assessment of partners; unofficial economy and the state budget; economic security business; the role and importance of law in business. The book looks at the threats and risks arising from international trade and operating leading businesses, plus the role of the State. It examines the required new forms, methods and approaches for management. This has significant implications for the businesses concerned and the State's role. 'The Economic Security of Business Transactions' includes coverage of internal company factors, tax evasion and tax avoidance; the book also looks at the level of involvement of the State (especially the EU's Common Market). This leads to abuses and distortions in the area of the competitiveness of enterprises and countries' competitiveness; it also changes the perception of contemporary economic security. This book is an attempt to point to the example of single countries, the European Community, and on a global scale - what is the efficiency of national economic systems and how the associated risks impact upon economic trade disorders. Key Features Contains contributions from some of the world's leading researchers. Has an interdisciplinary character - based on economics, management and law. Shows and defines real threats and risks which occur in economic trade. The Authors Konrad Raczkowski is Professor of Management, who specializes in the unofficial economy, public finances and management in the economic system. He is a Director of Economic Institute in University of Social Sciences in Warsaw; he was Head of the Department of the Economic Security Management. Between 2003 and 2013 he worked in the finance department. He was also the advisor and consultant to governmental institutions, entrepreneurs and the European Anti-Fraud Office in Brussels (OLAF). He has qualifications as an internal auditor of integrated management systems. Professor Raczkowski is a member of British Academy of Management and since 2008 he has been an associate of the Institute for Security and Development Policy in Stockholm. Friedrich Schneider is Professor of Economics at the Department of Economics at the Johannes Kepler University of Linz in Austria. He is recognized as a leading authority in the field of studies on the shadow world economy. He has conducted research and lectures, among institutions such as the Universities of Yale, Princeton, Virginia, Stockholm, Zurich, Carnegie Mellon and Aarhus. In the years 1997-1999 he was the President of the Austrian Economic Association and in 2005-2008 the President of the German Economic Association. He has advised many governments, entrepreneurs and the European Commission. He is the author or co-author of hundreds of publications, including 62 books published in many languages. Professor Schneider's research interests focus on the theory of economic policy, finance and the analysis of economic consequences of government intervention. Readership Scientists and researchers of national economy and unofficial economy; people experienced in the management (public and business); entrepreneurs; and students Contents PART I.
