Annihilation is the first volume in Jeff VanderMeer's Southern Reach trilogy, Authority is the second, and Acceptance is the third. Area X—a remote and lush terrain—has been cut off from the rest of the continent for decades. Nature has reclaimed the last vestiges of human civilization. The first expedition returned with reports of a pristine, Edenic landscape; all the members of the second expedition committed suicide; the third

Expedition died in a hail of gunfire as its members turned on one another; the members of the eleventh expedition returned as shadows of their former selves, and within months of their return, all had died of aggressive cancer. This is the twelfth expedition. Their group is made up of four women: an anthropologist; a surveyor; a psychologist, the de facto leader; and our narrator, a biologist. Their mission is to map the terrain and collect specimens; to record all their observations, scientific and otherwise, of their surroundings and of one another; and, above all,

to avoid being contaminated by Area X itself. They arrive expecting the unexpected, and Area X delivers—they discover a massive topographic anomaly and life forms that surpass understanding—but it's the surprises that came across the border with them, and the secrets the expedition members are keeping from one another, that change everything. After the disastrous twelfth expedition chronicled in Annihilation, the Southern Reach—the secret agency that monitors these expeditions—is in disarray. In Authority, John Rodriguez, aka “Control,” is

the team's newly appointed head. From a series of interrogations, a cache of hidden notes and hours of profoundly troubling video footage, the secrets of Area X begin to reveal themselves—and what they expose pushes Control to confront disturbing truths about both himself and the agency he's promised to serve. And the consequences will spread much further than that. It is winter in Area X in Acceptance. A new team embarks across the border on a mission to find a member of a previous expedition who may have been left behind. As they press deeper into the

Unknown—navigating new terrain and new challenges—the threat to the outside world becomes more daunting. The mysteries of Area X may have been solved, but their consequences and implications are no less profound—or terrifying.

The Southern Reach Trilogy begins with this Nebula Award-winning novel that "reads as if Verne or Wellsian adventurers exploring a mysterious island had warped through into a Kafkaesque nightmare world" (Kim Stanley Robinson). Area X has been cut off from the rest of the continent for decades.

Nature has reclaimed the last vestiges of human civilization. The first expedition returned with reports of a pristine, Edenic landscape; the second expedition ended in mass suicide; the third expedition in a hail of gunfire as its members turned on one another. The members of the eleventh expedition returned as shadows of their former selves, and within weeks, all had died of cancer. It is winter in Area X, the mysterious wilderness that has defied explanation for thirty years, rebuffing expedition after expedition, refusing to reveal its secrets. As Area X expands, the agency tasked with investigating and overseeing it--the Southern Reach--has collapsed on itself in confusion. Now one last, desperate team crosses the border, determined to reach a remote island that may hold the answers they've been seeking. If they fail, the outer world is in peril. Meanwhile, Acceptance tunnels ever deeper into the circumstances surrounding

the creation of Area X--what initiated this unnatural upheaval? Among the many who have tried, who has gotten close to understanding Area X--and who may have been corrupted by it? In this last installment of Jeff VanderMeer's Southern Reach trilogy, the mysteries of Area X may be solved, but their consequences and implications are no less profound--or terrifying.

A Peculiar Peril is a head-spinning epic about three friends on a quest to protect the world from a threat as unknowable as it is terrifying, from the Nebula Award-winning and New

York Times bestselling author of Annihilation, Jeff VanderMeer. Jonathan Lamshead stands to inherit his deceased grandfather's overstuffed mansion—a veritable cabinet of curiosities—once he and two schoolmates catalog its contents. But the three soon discover that the house is filled with far more than just oddities: It holds clues linking to an alt-Earth called Aurora, where the notorious English occultist Aleister Crowley has stormed back to life on a magic-fueled rampage across a surreal, through-the-looking-glass version of Europe replete with talking

Animals (and vegetables). Swept into encounters with allies more unpredictable than enemies, Jonathan pieces together his destiny as a member of a secret society devoted to keeping our world separate from Aurora. But as the ground shifts and allegiances change with every step, he and his friends sink ever deeper into a deadly pursuit of the profound evil that is also chasing after them.

Sisters of the Revolution gathers a highly curated selection of feminist speculative fiction (science fiction, fantasy, horror, and more) chosen by one of the most respected editorial teams in speculative literature today, the award-winning Ann and Jeff VanderMeer. Including stories from the 1970s to the present day, the collection seeks to expand the conversation about

Download Free Trilogia Dellarea X Annientamento

feminism while engaging the reader in a wealth of imaginative ideas. From the literary heft of Angela Carter to the searing power of Octavia Butler, *Sisters of the Revolution* gathers daring examples of speculative fiction's engagement with feminism. Dark, satirical stories such as Eileen Gunn's "Stable Strategies for Middle Management" and the disturbing horror of James Tiptree Jr.'s "The Screwfly Solution" reveal the charged intensity at work in the field. Including new, emerging voices such as Nnedi Okorafor and featuring international contributions

From Angelica Gorodischer and many more, this collection seeks to expand the ideas of both contemporary fiction and feminism to new fronts. Moving from the fantastic to the futuristic, subtle to surreal, these stories will provoke thoughts and emotions about feminism like no other book available today. Other contributors include Anne Richter, Carol Emshwiller, Eleanor Arnason, Hiromi Goto, Joanna Russ, Karin Tidbeck, Kelley Eskridge, Kelly Barnhill, Kit Reed, L. Timmel Duchamp, Leena Krohn, Leonora Carrington, Pamela Sargent, Rose Lemberg, Susan Palwick,

It is 1962, and Elisa Esposito-mute her whole life, orphaned as a child-is struggling with her humdrum existence as a janitor working the graveyard shift at Baltimore's Occam Aerospace Research Center. Were it not for Zelda, a protective coworker, and Giles, her loving neighbor, she doesn't know how she'd make it through the day. Then, one fateful night, she sees something she was never meant to see, the Center's most sensitive asset ever: an amphibious man, captured in the Amazon,

to be studied for Cold War advancements. The creature is terrifying but also magnificent, capable of language and of understanding emotions... and Elisa can't keep away. Using sign language, the two learn to communicate. Soon, affection turns into love, and the creature becomes Elisa's sole reason to live. But outside forces are pressing in. Richard Strickland, the obsessed soldier who tracked the asset through the Amazon, wants nothing more than to dissect it before the Russians get a chance to steal it. Elisa has no choice but to risk

everything to save her beloved. With the help of Zelda and Giles, Elisa hatches a plan to break out the creature. But Strickland is on to them. And the Russians are, indeed, coming. Developed from the ground up as a bold two-tiered release-one story interpreted by two artists in the independent mediums of literature and film-The Shape of Water is unlike anything you've ever read or seen.

The Strange Bird—from New York Times bestselling novelist Jeff VanderMeer—is a novella-length digital original that expands and

Weaves deeply into the world of his "thorough marvel"* of a novel, Borne. The Strange Bird is a new kind of creature, built in a laboratory—she is part bird, part human, part many other things. But now the lab in which she was created is under siege and the scientists have turned on their animal creations. Flying through tunnels, dodging bullets, and changing her colors and patterning to avoid capture, the Strange Bird manages to escape. But she cannot just soar in peace above the earth. The sky itself is full of wildlife that rejects her as one of their

own, and also full of technology—satellites and drones and other detritus of the human civilization below that has all but destroyed itself. And the farther she flies, the deeper she finds herself in the orbit of the Company, a collapsed biotech firm that has populated the world with experiments both failed and successful that have outlived the corporation itself: a pack of networked foxes, a giant predatory bear. But of the many creatures she encounters with whom she bears some kind of kinship, it is the humans—all of them now simply scrambling to survive—who are the most

insidious, who still see her as simply something to possess, to capture, to trade, to exploit. Never to understand, never to welcome home. With *The Strange Bird*, Jeff VanderMeer has done more than add another layer, a new chapter, to his celebrated novel *Borne*. He has created a whole new perspective on the world inhabited by Rachel and Wick, the Magician, Mord, and *Borne*—a view from above, of course, but also a view from deep inside the mind of a new kind of creature who will fight and suffer and live for the tenuous future of this world. Southern Reach Trilogy was an ever-creeping map of the apocalypse; with Borne he continues his investigation into the malevolent grace of the world, and it's a thorough marvel." –Colson Whitehead "VanderMeer is that rare novelist who turns to nonhumans not to make them approximate us as much as possible but to make such approximation impossible. All of this is magnified a hundredfold in Borne . . . Here is the story about biotech that VanderMeer wants to tell, a vision of the nonhuman not as one fixed thing, one fixed destiny, but as either peaceful or catastrophic, by

our side or out on a rampage as our behavior dictates—for these are our children, born of us and now to be borne in whatever shape or mess we have created. This coming-of-age story signals that eco-fiction has come of age as well: wilder, more reckless and more breathtaking than previously thought, a wager and a promise that what emerges from the twenty-first century will be as good as any from the twentieth, or the nineteenth.” —Wai Chee Dimock, *The New York Times Book Review*

il tema principale della nostra cultura. I giornali dedicano uno spazio crescente all'ultima scoperta, i festival e le letture pubbliche veicolano le nuove visioni del mondo e la lettura scientifica dei fatti e dei comportamenti fa capolino anche nel quotidiano. Il rischio è quello di dimenticare che la scienza è una pratica cognitiva, non una piramide di verità rivelate e accumulate una volta per tutte.
