Wei Gao Caltech For Web

This is likewise one of the factors by obtaining the soft documents of this wei gao caltech for web by online. You might not require more time to spend to go to the book opening as with ease as search for them. In some cases, you likewise reach not discover the statement wei gao caltech for web that you are looking for. It will agreed squander the time.

However below, in the same way as you visit this web page, it will be appropriately unconditionally easy to get as without difficulty as download guide wei gao caltech for web

It will not acknowledge many time as

we run by before. You can get it while
feint something else at home and even
in your workplace. appropriately easy!
So, are you question? Just exercise
just what we offer below as without
difficulty as review wei gao caltech for
web what you with to read!

Wei Gao Caltech For Web

Research Overview. Professor Gao's primary research interest is in the development of novel bioelectronic devices for personalized and precision medicine: wearable and flexible biosensors that can analyze the various biomarkers in body fluids for real-time continuous health monitoring and early diagnosis, and synthetic micro/nanomachines for rapid drug delivery and precision surgery.

The Gao Research Group at the California Institute of Technology is a highly interdisciplinary research team devoted to developing versatile bioelectronic devices for fundamental and applied biomedical studies. Our research thrusts include fundamental materials and chemistry innovations as well as important device and system level applications toward personalized and precision medicine.

Caltech's Wei Gao, assistant professor of medical engineering in the Andrew and Peggy Cherng Department of Medical Engineering, has been developing these sensors as well as novel approaches to power them using the human body itself. Previously, he created a sensor that could monitor health indicators in human sweat that is powered by sweat itself.
